

WIFI

General Delegate Access

General Delegate Access log on to CHW guest network with the password provided and accept the terms and conditions (please use this for as many people as possible up to a maximum of 600 devices as the network will get jammed if we keep more than but a few people on the staff wifi network).

Organiser access

The organiser can use the CHW guest network using the delegate password. If the organiser wants a connection for a long period of time, then please offer a wired connection prior to a wifi connection. If a wired connection is unacceptable and they require internet all day, then they can use CHW staff network using the password CHCC 5t4ff! The amount of people given this password should be restricted to as few as possible – see note below

IMPORTANT NOTE on using Staff wifi Network

If the staff wifi network is over-used the wifi will stop working as the CHW STAFF NETWORK keeps people logged on to the network all the time. Therefore, too many people staying logged on will prevent it being able to process new people / equipment wanting to join the network and there will be complaints. It is therefore very important that the majority of people are given the **CHW guest network pass as it logs them off after a time period.** **This** prevents the network clogging up. Please offer a wired connection before the all-day CHCC staff network wifi connection.
